Summary

AI and Data Science Master's candidate with strong expertise in **designing, developing, and deploying intelligent full-stack AI solutions** using **FastAPI, MEAN Stack, and transformer-based models**. Experienced in **machine learning, natural language processing, computer vision, and data analytics**. Passionate about building **scalable, data-driven systems** that solve real-world problems and optimize processes. Seeking a **full-time position** to apply technical skills, contribute to innovative projects, and further deepen expertise in **AI, analytics, and software development**.

Experience

NTT DATA	Cabo Negro, Morocco
Master's Final Year Internship - Enterprise Knowledge Assistant for Microsoft Teams using (RAG) PFE	02/2026 - 07/2026
- Developed a RAG-based Enterprise Knowledge Assistant for Microsoft Teams using SharePoint. - Implemented hybrid retrieval (vector search + BM25), intent routing, and conversational memory to improve answer quality. - Enforced Microsoft Entra ID role-based access control and citation validation for secure, traceable responses. Automated SharePoint document ingestion and synchronization for real-time knowledge updates. Technologies: Azure, LangChain, FastAPI, Qdrant, Redis, Docker, Celery, VLLm, Ollama, Grafana, Langfuse, Prometheus, Microsoft Graph API	
DIGIUP	Rabat, Morocco
Application Internship - AI-Enhanced Healthcare Platform PFA	07/2025 - 09/2025
Smart healthcare management platform that digitizes hospital workflows and centralizes patient records. - Enables seamless patient-doctor-staff interaction with real-time dashboards and smart scheduling. - Built real-time dashboards and smart scheduling, increasing staff-patient interaction efficiency by 30-40% within hospital departments. Technologies : FastApi, React.js, Transformers, BERT, LangChain, RAG, Fine-Tuning, Redis, Celery, Nginx	
Smart automation technologies	Tangier, Morocco
Bachelor's Final Year Internship – Marketing Operations Management Platform PFE	04/2024 - 06/2024
- Developed a full-stack marketing operations platform using the MEAN Stack, automating over 60% of marketing tasks. - Enhanced campaign management efficiency by 40-50% through integrated real-time analytics and process automation. Technologies : MEAN Stack (MongoDB, Express.js, Angular, Node.js)	

Projects

Real-Time Amazon Sentiment Analysis Pipeline
Kafka, Spark MLlib, MongoDB, Docker, NLP(Lemmatisation, TF-IDF, ...), Scrapping, Machine Learning, React, FastAPI
Charged System Search Adapted Using Genetic Algorithm For Solving the Travelling Salesman Problem
Charged System Search (CSS), Genetic Algorithms, CBR

Education

Faculty of Sciences and Technologies Tangier	Tangier, Morocco
Master's in Artificial Intelligence and Data Science	2024 - 2026
Faculty of Sciences and Technologies Tangier	
Faculty of Sciences and Technologies Tangier	Tangier, Morocco
Bachelor's Degree in Software Engineering and Application Development	2021 - 2024
Faculty of Sciences and Technologies Tangier	

Skills

- Machine Learning & Deep Learning** : Transformers, LangChain/LangGraph, Scikit-learn, TensorFlow, PyTorch, keras, OpenCV, Graphiti, Ollama
- Data Analysis, Processing, and Visualization** : NumPy, Pandas, PowerBi, Talend, Seaborn, Matplotlib
- Data Engineering & Big Data Tools** : Spark, Kafka, Hadoop, Celery, Airflow, Redis
- Databases & Cloud/Infrastructure Tools** : Qdrant, MySQL, PostgreSQL, MongoDB, OpenStack, Terraform, Hyperledger Fabric
- DevOps** : Docker, Git
- Programming Languages** : Python, Java, C++, C
- Web Development** : React, FastAPI, Flask, SpringBoot
