Marrakech/Tanger

Summary

AI and Data Science Master's candidate with hands-on experience developing **production-oriented AI** and **Generative AI systems**. Experienced in **Python, FastAPI, RAG, LLM workflows, hybrid retrieval, vector search, Transformers**, and **AI infrastructure**. Interested in building reliable end-to-end AI solutions and solving complex real-world problems through applied AI and data engineering.

Experience

NTT DATA

Cabo Negro, Morocco

Master's Final Year Internship - Enterprise Knowledge Assistant for Microsoft Teams using (RAG) | PFE

02/2026 - 07/2026

- Developed a **production-oriented RAG-based** Enterprise Knowledge Assistant for **Microsoft Teams** using **Python, FastAPI, LangChain**, and **SharePoint**.
- Implemented **hybrid retrieval** combining **vector search** and **BM25**, intent routing, **conversational memory**, and **retrieval optimization**.
- Implemented secure retrieval with **Microsoft Entra ID role-based access control** and **citation validation** for reliable, **traceable responses**.
- Automated SharePoint document ingestion** and **synchronization** to maintain **up-to-date enterprise knowledge**.
- Built and evaluated AI infrastructure using **Qdrant, Redis, Celery, Docker, vLLM, Ollama, Langfuse, Grafana**, and **Prometheus**.
- Technologies: Azure, LangChain, FastAPI, Qdrant, Redis, Docker, Celery, vLLM, Ollama, Grafana, Langfuse, Prometheus, Microsoft Graph API**

DIGIUP

Rabat, Morocco

Application Internship - AI-Enhanced Healthcare Platform | PFA

07/2025 - 09/2025

- Smart healthcare management platform** that digitizes hospital workflows and centralizes patient records.
- Enables seamless patient-doctor-staff interaction with real-time dashboards and smart scheduling.
- Built **real-time dashboards and smart scheduling**, increasing staff-patient interaction efficiency by **30-40%** within hospital departments.
- Technologies : FastApi, React.js, Transformers, BERT, LangChain, RAG, Fine-Tuning, Redis, Celery, Nginx**

Smart automation technologies

Tangier, Morocco

Bachelor's Final Year Internship – Marketing Operations Management Platform | PFE

04/2024 - 06/2024

- Developed a full-stack marketing operations platform using the MEAN Stack, automating over **60%** of marketing tasks.
- Enhanced campaign management efficiency by **40-50%** through integrated real-time analytics and process automation.
- Technologies : MEAN Stack (MongoDB, Express.js, Angular, Node.js)**

Education

Faculty of Sciences and Technologies Tangier

Tangier, Morocco

Master's in Artificial Intelligence and Data Science

2024 - 2026

- Faculty of Sciences and Technologies Tangier

Faculty of Sciences and Technologies Tangier

Tangier, Morocco

Bachelor's Degree in Software Engineering and Application Development

2021 - 2024

- Faculty of Sciences and Technologies Tangier

Projects

Real-Time Amazon Sentiment Analysis Pipeline

- Kafka, Spark MLlib, MongoDB, Docker, NLP(lemmatisation, TF-IDF, ...), Scrapping, Machine Learning, React, FastAPI

Charged System Search Adapted Using Genetic Algorithm For Solving the Travelling Salesman Problem

- Charged System Search (CSS), Genetic Algorithms, CBR

Skills

- AI & Generative AI Engineering** : Transformers, LangChain, LangGraph, RAG, LLM Workflows, Graphiti, Scikit-learn, TensorFlow, PyTorch, Keras, OpenCV, Ollama, vLLM
- Data Analysis, Processing, and Visualization** : NumPy, Pandas, PowerBi, Talend, Seaborn, Matplotlib
- Data Engineering & Big Data Tools** : Spark, Kafka, Hadoop, Celery, Airflow, Redis
- Databases & Cloud/Infrastructure Tools** : Qdrant, SQL, MySQL, PostgreSQL, MongoDB, OpenStack, Terraform, Hyperledger Fabric
- DevOps** : Docker, Git
- Programming Languages** : Python, Java, C++, C
- Web Development** : React, FastAPI, Flask, SpringBoot

Languages

Arabic (Fluent)

English (Fluent)

French (Intermediate)
